STUDY IN A TOP LEVEL FRENCH INSTITUTION

Ecole normale supérieure de Lyon (ENS Lyon) is one of the four prestigious French Ecoles normales supérieures. Its mission is to prepare, each year, nearly 200 highly selected students for teaching, university or executive positions in research, government and business.

ENS Lyon offers studies covering Mathematics, Computer Sciences, Physics, Chemistry, Biology and Earth Sciences. Quality, flexibility, autonomy, a tutorial system, a direct link with high-level research are the main keywords that characterize the teaching system at ENS Lyon. Students are selected two years after finishing high school through national exams or specific application processes. About 85% of them complete their studies with a Ph.D.

Research activities are organized around 10 laboratories totalling about 500 professors, permanent scientists, doctorate students, post-doctorate researchers and visitors : Pure and applied mathematics, Computer sciences, Physics, Chemistry, Astronomical research centre, Earth sciences, Molecular and cellular biology, Plant reproduction and development, Human virology, Joliot-Curie interdisciplinary laboratory.

All these laboratories are strongly supported by the French National Research Institutes (CNRS, INRA, INSERM, INRIA) and have close connections with the industry and many national or international academic institutions.

in a higher education institution outside in their final year of undergraduate studies is aimed at outstanding students currently recruitment for Master studies. This selection ENS Lyon organizes an international selective

• **Master's program international fellowships**

LYON, AN INTERNATIONAL CITY

ENS Lyon is located in the Gerland-District Technology cluster in the southern part of Lyon, 15 minutes from the center of the city. With a population of 1.2 million inhabitants, Lyon receives nearly 110,000 students, including 11,000 foreign students.

Lyon and its region are in line with the dynamic economic image of a major European hub. This success, which is deeply rooted in Lyon's history, results mainly from a remarkable synergy between economic development, multisectorial research and international collaboration. With a widely recognized reputation for its quality of life, its gastronomy and cultural activities, Lyon has all the attributes of a metropolitan city, with international scope. Close to the well-known Beaujolais wine region, Lyon is ideally situated with easy access to the Alpine ski resorts and the sunny Mediterranean coast. In 1998, the historical site of Lyon was given a World Heritage classification by UNESCO.
