

Geometric and Analytic Group Theory

Ventotene (LT), Italy, September 9 - 14, 2013

There will be research talks in addition to the following four minicourses:

Weyl group approach to rigidity

Uri Bader (Technion)

Alex Furman (UIC)

Fixed point properties: property (T), amenability and a-T-menability

Nicolas Monod (EPFL)

Ergodic theory from amenable to non-amenable groups

Amos Nevo (Technion)

CAT(0) cube complexes

Piotr Przytycki (Polish Academy of Sciences)

Organizers:

Alessandra Iozzi (ETHZ)

Maria Gabriella Kuhn (Università di Milano Bicocca)

Michah Sageev (Technion)
