

The University of Nottingham Ningbo China is organizing the  
Research Summer School

***“Free discontinuity problems and applications in fracture mechanics”***

The school will take place at the University of Nottingham Ningbo China in **August 14-18, 2017**.

The speakers and the topics of the mini-courses are

**John Andersson** (Royal Inst. of Technology, Sweden)  
Regularity of sets defined by partial differential equations

**Blaise Bourdin** (Louisiana State University, USA)  
Variational phase-field models of fracture

**Gilles Francfort** (University Paris-Nord, France)  
Brittle fracture: A variational approach

Applications (one page CV, up to half-page statement) should be sent by **June 15th** 2017 to

**[Fracture2017@nottingham.edu.cn](mailto:Fracture2017@nottingham.edu.cn)**

***!!! A limited number of scholarships covering local expenses is available !!!***
