# Contents

**1 Tools** . . . . . 1
1.1 Introduction . . . . . 1
1.2 Convex functions of one variable . . . . . 2
1.3 Convex functions of several variables . . . . . 8
1.4 The fundamental lemma of Calculus of Variations . . . . . 15
1.5 The Dirichlet principle . . . . . 19
1.6 Elliptic operators . . . . . 27
1.7 Problems . . . . . 32

**2 Some one-dimensional variational problems** . . . . . 39
2.1 Introduction . . . . . 39
2.2 Curves of minimal action . . . . . 40
2.3 The brachistocrone problem . . . . . 43
2.4 Sharp Poincaré constants . . . . . 56
2.4.1 Functions vanishing at the endpoints . . . . . 56
2.4.2 Functions with zero average . . . . . 67
2.4.3 Periodic functions with zero average . . . . . 71
2.5 The harmonic oscillator . . . . . 75
2.6 The classical isoperimetric inequality in the plane . . . . . 79
2.7 A further isoperimetric-type problem . . . . . 82
2.8 Problems . . . . . 88

**3 Sobolev spaces** . . . . . 93
3.1 Introduction: why do we need Sobolev spaces? . . . . . 93
3.2 Weak derivatives . . . . . 96
3.3 Sobolev spaces . . . . . 105
3.4 Some operations on Sobolev functions . . . . . 109
3.5 Poincaré–type inequalities . . . . . 115
3.6 Sobolev–type inequalities . . . . . 126
3.7 The space $W_0^{1,p}$ . . . . . 138
3.8 Embedding theorems for $W_0^{1,p}$ . . . . . 150

3.9 Embedding theorems for $W^{1,p}$ . . . 157
3.10 Some further Poincaré–type inequalities . . . 168
3.11 Finite differences and Sobolev spaces . . . 172
3.12 Problems . . . 175

**4 The Direct Method in Sobolev spaces** . . . 181
4.1 A model case: harmonic functions . . . 181
4.2 A lower semicontinuity result . . . 183
4.3 An existence result in Sobolev spaces . . . 189
4.4 *Intermezzo*: superharmonic functions . . . 198
4.5 Example: torsional rigidity . . . 202
4.6 Example: the sublinear Lane-Emden equation . . . 205
4.7 Example: the first eigenvalue of the Dirichlet-Laplacian . . . 208
4.8 Example: the spectrum of the Dirichlet-Laplacian . . . 214
4.9 Example: the superlinear Lane-Emden equation . . . 225
4.10 Problems . . . 229

**5 Lipschitz functions** . . . 237
5.1 Definitions and basic properties . . . 237
5.2 Differentiability of Lipschitz functions . . . 245
5.3 Some operations on Lipschitz functions . . . 252
5.4 Lipschitz functions VS. Sobolev functions . . . 255
5.5 Problems . . . 258

**6 The Direct Method in Lipschitz spaces** . . . 263
6.1 Introduction . . . 263
6.2 A toy existence result . . . 264
6.3 The comparison principle . . . 269
6.4 The bounded slope condition . . . 273
6.5 The Miranda-Stampacchia existence theorem . . . 279
6.6 Two special cases . . . 282
6.7 Two counter-examples to existence . . . 284
6.7.1 Harmonic functions . . . 284
6.7.2 Cartesian minimal surfaces . . . 287
6.8 Problems . . . 292

**7 Excerpts from Regularity Theory** . . . 297
7.1 Introduction . . . 297
7.2 The Caccioppoli inequality . . . 298
7.3 Boundedness . . . 304
7.4 A Harnack–type estimate . . . 310
7.5 Hölder continuity . . . 315
7.6 Higher differentiability . . . 320
7.7 Classical regularity . . . 326
7.8 Problems . . . 327

**8 Solutions to problems** . . . 331
8.1 Problems of Chapter 1 . . . 331
8.2 Problems of Chapter 2 . . . 362
8.3 Problems of Chapter 3 . . . 388
8.4 Problems of Chapter 4 . . . 426
8.5 Problems of Chapter 5 . . . 461
8.6 Problems of Chapter 6 . . . 474
8.7 Problems of Chapter 7 . . . 487

**A Harmonic functions in a disk** . . . 493
A.1 The gradient in polar coordinates . . . 493
A.2 The Laplacian in polar coordinates . . . 494
A.3 Circular harmonics in the plane . . . 496

**B Compactness results in $L^p$ spaces** . . . 503
B.1 Weak compactness . . . 503
B.2 Strong compactness . . . 505
B.3 Convex combinations . . . 507

**C Homogeneous Sobolev spaces** . . . 511
C.1 The completion space $\mathcal{D}_0^{1,p}$ . . . 511
C.2 Comparison with $W_0^{1,p}$ . . . 515
C.3 The case $1 \le p < N$ on the whole space . . . 517

**D A glimpse of traces and fractional Sobolev spaces** . . . 523
D.1 The trace inequality in the half-space . . . 523
D.2 The trace operator in the half-space . . . 531

**Index** . . . 539

**References** . . . 541
